## IN-LINE SOLENOID VALVE Series SOV L

SOV L solenoid valves belong to the LINE ON LINE ${ }^{\circledR}$ family, which means they can be connected to all the other components in series or in parallel.
Available in the version for pipe-pipe connection with two FOX push-in fittings, and in the version for thread-pipe connection with a brass nickel-plated male thread and a push-in fitting.
Though small in size, SOV L valves are solenoid-piloted and feature very high performance.
The spool distributor is fitted with special polyurethane gaskets to ensure a very long working life.
Each valve comes complete with a monostable manual control and LED.
Exhaust can be damped with an annular silencer or conveyed via a pipe fitting. The fitting for conveyed exhaust can be oriented freely.

## ASSEMBLY OPTIONS

How to mount the SOV L:

- Fig. A: With the male threaded port it is possible to mount the SOV L straight onto the actuator.
- Fig. B: Fixing to the plate with the special SQU L bracket.
- Fig. C: There are two robust rings on the plastic body for fixing the SOV L straight onto the wall.
